SINKS

## Care & Maintenance

Hammered Stainless Steel

### Care & Maintenance Instructions

- Clean your sink on a regular basis, rather than only periodically with heavy-duty cleaners.
- Use a non-abrasive cleaning cloth combined with a mild cleaning procedure, free of bleach (ex: The Original Dawn®)
- Do not use steel wool on your sink.
- If aggressive cleaning is needed on your stainless steel sink, we recommend Flitz Polish Paste® or liquid metal polish for a deep cleaning to restore the shine. After polishing, you can use Flitz Faucet Wax Plus® to protect the sink from normal patina. Follow the product directions.
- Keep your sink shiny and free of water spots by towel drying after every use.

---

\* **The use of any cleaners or disinfectants other than mild soap and water will void the warranty. Also, personal care and everyday use products (ex: face cleansers, toothpaste, male grooming products, wine, fruit acid, ketchup, etc.) can and will alter the finish, voiding the warranty.**

If you have further questions about taking care of your sink or have a particularly tough stain, feel free to contact us and we will be happy to help.
